Abstract (en)

Systems and methods for haptic remote control gaming are disclosed. A portable multifunction device receives information from a remotely controllable device. The portable multifunction device can be operable as a remote control for the remotely controllable device. The portable multifunction device may be a smartphone, a tablet computer, or another suitable electronic device. The portable multifunction device can determine a haptic effect based at least in part on the information received from the remotely controllable device. The portable multifunction device may generate a signal configured to cause an actuator to output the determined haptic effect. The portable multifunction device can output the signal.
