Abstract (en)

[origin: WO2012136664A1] The invention relates to a straddle carrier device (1) for ISO containers, comprising electric drives which are powered by a battery (13) and comprising liftable and lowerable load-receiving means (11) for the ISO containers. The aim of the invention is to provide an improved fully electric straddle carrier device. This is achieved in that the battery (13) is arranged above the load receiving means (11).
