Abstract (en)

[origin: WO2012130332A1] In order to hydrophobe surfaces easily and quickly, a polysiloxane concentrate is provided that in particular can be dispensed by means of a pressure washing device, wherein the concentrate comprises one or more amino-functional polysiloxanes having a fraction of approx. 1 wt% to 7 wt% as an aqueous emulsion. Thus, a uniform treatment result is achieved even for large-area dispensing and for surfaces having complex shapes.
