Abstract (en)
[origin: WO2012136174A2] The invention relates to the modular system of construction precast units (10, 20, 30, 40, 50), especially the construction precast units for buttress or dividing walls, including a pair of separate building elements having unit height (vj), of which each building element is furnished with one part of the dovetail joint for mutual coupling of separate building elements by vertically oriented dovetail joint while one of the pair of the building elements is a face plate (1, 2) and the other of the pair of building elements is a coupling block (3, 4, 5, 6). The modular system of construction precast unit includes at least another one face plate (11, 21) and/or another coupling block (3, 4, 5) with different height that the unit one (vj), while another face plate (11, 21) and/or another coupling block (3, 4, 5) are furnished with relevant part of the dovetail joint.
