Abstract (en)  
[origin: WO2012136292A1] A description is given of a pivot lever actuation unit (10) comprising an actuating handle (22), which can be swung out of a hollow (12) and then pivoted, and an adaptor part (14), which can be screwed on beneath the hollow (12), wherein the actuation unit (10) has a modular construction which allows certain outer constituent parts to be changed over and likewise makes flexible reconstruction possible.
