Abstract (en)

[origin: WO2012136563A2] The invention relates to an ice cube maker system (10) for a refrigerator comprising a freezing compartment and a door (200) for opening and closing the freezing compartment. The ice cube maker system (10) has an ice cube generating device (20) and an ice cube storage device (130), wherein the ice cube generating device (20) and the ice cube storage device (130) can be attached to the door (200) and detached from the door (200) independently of each other. The invention further relates to a refrigerator comprising a freezing compartment, a door (200) for opening and closing the freezing compartment and at least one such ice cube maker system.
