Abstract (en)  
[origin: WO2012136641A1] This method of locating a terminal (12) in a zone, said method comprising: a step (28, 29) of setting the spatial coordinates of the terminal (12), carried out within a geolocation software (16) of the terminal (12); a step (34) of measuring the displacement of the terminal (12) by autonomous means for measuring a displacement (20, 21) which are integrated into the terminal (12); a step (36) of estimating the spatial coordinates, carried out by the geolocation software (16) on the basis of the displacement transmitted by the autonomous means for measuring a displacement (20, 21); a step (30) of displaying the geographical position of the terminal (12) by display means (24) integrated into the terminal (12); is characterized in that it comprises: a step (29) of transmission by a location data support (13) installed permanently in the zone, of its geographical position to the terminal (12); and a step (41) of adjusting the spatial coordinates of the terminal (12), carried out within the geolocation software (16) on the basis of the geographical position of the location data support (13).
