Abstract (en)

[origin: EP2695548A1] The device (1) has housing (2) that is provided with a storage container. A pumping device has a pump unit with a vertically displaceable adjustment pressure piece and a flexible discharge hose that is arranged on the upper side on the storage container. An outlet pipe (9) is provided on the housing for partially receiving the flexible outlet hose. An actuating unit is provided with a stop element for operating the pressure piece of the pump unit.
