Abstract (en)

[origin: EP2695565A1] The dishwasher (1) has a sound shield (23) whose hard holding portion (24) is arranged at a machine base (19) of a base support (1.U) or at an outer door (3.2) of a container door (3). The hard holding portion and a hard lip region face towards a sound proof system at the outer door of the container door or at the machine base of the base support. A neck region is arranged between the hard holding portion and the hard lip region, where resilient deformability of the sound proof system of the hard lip region is enabled with the container door.
