Abstract (en)

[origin: EP2695646A1] The arrangement has a gliding board (5) provided with a gliding sole (52). A climbing device is detachably secured to the gliding board. Shoes (6) are guided to pivot about a transverse axis (A) transverse to the gliding board, by a front stop (3). The climbing device includes a non-return strip with an elongate strip (23). The elongate strip includes an upper surface (231) adapted to be pressed against the gliding sole, and a lower surface (232) coming into contact with the snow. The front stop is connected to the non-return strip. An independent claim is also included for a climbing device.
