Abstract (en)
Flat envelope, of the type having a rear surface (2), a front surface (1) and a closing flap (3), both the front and rear surfaces having two side flaps (4-5) separated by two "V"-shaped cuts (C1 a and C1 b), the vertices of which coincide with the transverse line (L1) that separates the rear and front surfaces, and with the corresponding side line (L3). The flaps (5a and 5b) have two cuts (C2a and C2b) affecting the areas corresponding to the free ends, next to the mouth of the envelope, that have a length at least equivalent to the sides of the flap (3), such that when making up the envelope it is located on top of said cuts; in such a way that the sides of the envelope have a uniform thickness along their entire length since they are formed by the same number of overlapping paper surfaces.
