Abstract (en)  
[origin: EP2695990A2] The appliance e.g. steam mop (10), has a water inlet (11) and a steam outlet (17), where a steam generator (14) is in communication with the water inlet and the steam outlet. Another steam generator (15) is in communication with the water inlet and the steam outlet, where the water inlet is in communication with an external water supply or an internal water reservoir (12). The former steam generator is operated continuously while the latter steam generator is pre-filled with preheated water in a standby state.
