Abstract (en)

[origin: EP2696001A1] The sanitary water valve has a water jet discontinued portion (11) that is installed in discharge pipe (10). The inner flow path (16) of discharge pipe is formed with clear cross-section without an additional discontinued portion, for flowing water. A discharge section (14) is conically combined with inlet portion (12). The inside surfaces (13,15) of the discontinued portion are partially coated with a silver material having antibacterial properties for contacting the water from flow path. The outer portion of discontinued portion is coated with chromium plating.
