Abstract (en)

[origin: EP2696006A2] The board (4) has two side faces connected to parallel surfaces that lie in blocked state of the board parallel to a build-side substrate (2). One side surface of the board is coated with flame retardant material, and a containing coating (5) is immediately applied all-over the side face. The containing coating comprises color based on silicate or organic base, the flame retardants and an organic and/or an inorganic binder. The side surface comprises a profile designed as groove or a spring. The coating comprises aluminum hydroxide, blowing graphite and/or flame retardants such as metal hydroxides, alkali metal silicates and hydrates of metal salts or oxides.
