Abstract (en)  
[origin: WO2012140091A1] A roll stripper device comprises a stripper (26, 27) mounted on a stripper support (4); a sensor (47, 47a); and a processor in a control system (48). The sensor is adapted to provide a measure of distance to a work roll (21) and the processor is adapted to determine the position of a tip (42) of the stripper (26, 27) relative to the work roll, using the distance provided by the sensor (47, 47a).
