Abstract (en)

[origin: WO2012140129A1] The invention relates to a washing element for a washing system, in particular an automatic motor-vehicle washing system, made of a foam material. In order to provide such a washing element (10; 50), the use of which can reduce the risk of damage to the object to be washed, the washing element (10; 50) is a foam film (12) that has a skin (24, 26) on at least one side, wherein the skin (24, 26) is provided with a surface profile (28) at least in some sections.
