Abstract (en)
[origin: CA2832790A1] A format adjustment device (1) is used to adjust the format of at least one functional element (7) on a packaging machine. The format adjustment device (1) comprises at least one bearing element (2), at least one format gauge (3) comprising at least one mounting section (4) and at least one position element (5) having a stop section (6), and at least one functional element (7) having a connecting section (8). The format gauge (3) can be connected to the bearing element (2) via the mounting section (4). The stop section (6) of the position element (5) can be connected to the connecting section (8) of the functional element (7), such that the position of the at least one functional element (7) relative to the bearing element (2) can be adjusted.
