Abstract (en)

[origin: WO2012139908A1] The invention relates to a connector (1) for hollow portions of profile member(s) (4), comprising two bars (2) connected by a contact pad (3) and intended to be inserted into the free ends of the hollow portions of profile member(s) (4), each bar (2) being provided with anchoring blades (20) arranged so as to engage with the profile member(s) (4) so as to mechanically attach the latter to the connector (1), and sealing blades (21) arranged so as to engage with the profile member(s) (4) in order to form a damp-proof course in the profile member(s) (4). The invention also relates to a double-pane window, the frame of which consists of hollow portions of profile member(s) (4) connected together by such a connector (1).
