Abstract (en)

[origin: WO2012139926A1] The invention relates to an operator control element for a domestic appliance, wherein the operator control element (1) has a main body (10) which is composed of plastic. The operator control element is characterized in that the plastic is admixed with filler which has a higher thermal conductivity than the plastic. The invention also relates to a domestic appliance having at least one operator control element. The operator control element is characterized in that at least one of the operator control elements constitutes an operator control element having a main body (10) which is composed of plastic, wherein the plastic is admixed with filler which has a higher thermal conductivity than the plastic.
