Abstract (en)  
[origin: WO2012139952A1] A machine compartment (2) of a refrigeration appliance, in particular of a household refrigeration appliance, comprises at least one compressor (4), an evaporation shell (11) mounted on the compressor (4), and a fan (7) for driving a cooling air stream on a cooling air path running through the machine compartment (2). The cooling air path comprises an evaporation section (13) which extends above the evaporation shell (11) and through which at least one part of the cooling air stream is guided.
