Abstract (en)  
[origin: WO2012140029A2] The invention relates to an evaporation apparatus (48) for evaporating defrost water (40) in a refrigerator (10), having a heat source (46) and having an evaporation drip tray (44) which has a receiving chamber (60) for receiving the defrost water (40). The evaporation drip tray (44) is arranged without being in contact with the heat source (46), the heat source (46) has a thermal conduction device (58), and the thermal conduction device (48) projects into the receiving chamber (60). The invention also relates to a refrigerator (10), in particular a domestic refrigerator, which has an evaporation apparatus (48) of this kind.
