Abstract (en)
[origin: WO2012143601A1] The fluid system for an internal combustion engine comprises at least a first fluid circuit (1) and a second fluid circuit (2), each of the fluid circuits (1, 2) forming part of a sub-system of an internal combustion engine. The fluid system further comprises a pump (3) for supplying fluid into the system, and a pressure intensification arrangement (4) comprising at least one pressure intensifier (6, 7, 8) and having at least two alternative intensification ratios.
