Abstract (en)
[origin: EP2515033A1] The invention is a modular lighting system (20) comprising connectable profile parts and one or more mounting places for lighting elements. The lighting system further comprises a central profile (10). Two of profile parts are wing profiles (21, 32) that are releasably connectable to both sides of the central profile (10) and one or more mounting places for lighting elements are arranged to the central profile (10). The modular lighting system (20) may further be made of aluminum and act as cooling means for lightning elements. The central profile (10) further forms a cable rack.
