Abstract (en)

[origin: WO2012143637A1] The invention relates to providing access to data of a digital book on a remote server (SER), wherein, in particular, at least one URL address is provided, said URL address pointing to the data of a single digital book. To this end: a) a hardware medium (CA) is provided, said hardware medium comprising a hidden indicator (COD) for a hardware-medium identifier, as well as an indicator for a first portion (URL1) of said URL address; and b) the server correlates the hardware-medium identifier with said data of the single digital book, in order to make the data of said single digital book accessible at a URL address created by the concatenation of said first URL address portion and the hardware-medium identifier.
