Abstract (en)
[origin: WO2012143109A1] The present invention relates to a layer body, at least comprising - a first layer comprising a conductive polymer; - a further layer following the first layer, comprising a fluorinated amine. The invention also relates to a process for the production of a layer body, the layer body obtainable by this process, electronic components comprising a layer body as well as the use of a fluorinated amine.
