Abstract (en)
[origin: EP2700591A2] The container has a container portion that is made of paper, paper composite or foil. The rectangular surface portion (20) and closure elements (34,40) are arranged in the container portion. A side strip (20A) is formed on one side of the surface portion and is fastened along a common L-shaped edge to each other. The closure elements are temporarily fixed in a rolled-up state by the side strip and/or surface portion. An independent claim is included for a method for filling container.
