Abstract (en)

An industrial truck comprising a platform (8) for the driver and a pivotal protection gate (100) and a releasable locking arrangement (200, 200', 300) for locking the protection gate (100) in a protective position (105) in which it protects a driver that is present on the platform (8) wherein the locking arrangement (200, 200', 300) is arranged such that it is unlocked when the protection gate (100) is pivoted upwards from the protective position (105) so that the protection gate (100) may be lowered to an essentially vertical rest position (106).
