Abstract (en)
[origin: EP2700881A2] The extractor hood (1) has a supporting profile (5) assigned to a hood body (2), where the supporting profile is detachably connected to the hood body. A supporting unit (6) is defined in the use position of the supporting profile. The supporting profile forms a flat surface portion that is projected in an area of the supporting unit in the direction of the hood body. The supporting profile has multiple projections (7) that are formed as a fixing unit or a receptacle. The supporting profile has an opening through which an electrical conducting unit or a fastening unit is guided.
