Abstract (en)
[origin: WO2012146617A1] The present invention relates to a process for recycling polyphasic mouldings (F1) comprising at least one foamed phase and at least one unfoamed phase produced by reaction injection moulding (RIM), wherein the moulding is first compressed, comminuted and heated and then processed in the plasticized state to a moulding (F2), the unfoamed phase comprising polyamide.
