Abstract (en)

A refrigerated transport system including at least one insulated cell and a refrigerating module which is associated with a cell for the refrigeration thereof. The cell is a unit which can be individually handled and which is provided to be mounted on a vehicle, with respect to which the cell is structurally independent and removably secured, furthermore, the refrigerating module is integrated in the cell and provided to be removably connected to the vehicle within limits with respect to the electrical equipment of the vehicle itself.
