Abstract (en)

[origin: EP2703320A1] The assembly (1) has a container (2) placed completely or partially above ground (S) and in filling position in which users fill waste in the container. A handling unit (4) is attached to the container to allow handling of the container by a collection vehicle so as to place the container in a container emptying position. A support device (3) is placed on the ground to support the container in filling position. Mass of the support device is greater than 80%, preferably greater than 100%, of the sum of useful mass of the container plus mass of empty container.
