Abstract (en)  
[origin: EP2703333A1] The apparatus (10) has a base frame (16) supported in an area of a slider cap frame, and a threaded spindle (18) guided in the base frame. The spindle is rotatable with a rotating device, and a hooking device (22) i.e. hook, is coupled with the spindle. The hooking device is hooked to a slider cap. The base frame has a socket (16.1) and a body (16.2) supported on the socket, where the socket encloses the hooking device. The base frame has a guide (28) for guiding a strike plunger (30) during loosening of the slider cap, where the body has metallic angle profiles connected with one another.
