Abstract (en)  
[origin: EP2703561A2] The device has an elongated marking element (10) i.e. plastic body, for forming a ground mark strip. A retaining bracket (28) connects the elongated element with a lateral footplate (20). The footplate is arranged adjacent to the elongated element. The retaining bracket includes a plug projection for insertion into vertical plug retainers (26) of the footplate. The elongated element includes a reflecting surface, which is profiled transverse to a longitudinal direction of the elongated element. The elongated element includes a base body in form of a plastic part.
