Abstract (en)

[origin: EP2703564A1] The guide frame (30) has a framework (32), which is inserted into the pipe and comprises a guide, along which the milling device is displaced. A clamping unit (40) is provided for clamping and fixing the framework in the pipe, and an adjusting unit (60) is provided, with which the milling device is adjusted within the pipe in a transverse direction relative to the pipe axis. The adjusting unit comprises a rotating unit (62), by which the milling device is rotated within the pipe. Independent claims are included for the following: (1) a device for removing soil within a pipe partially incorporated into the ground; and (2) a method for anchoring a pipe in the ground.
