Abstract (en)

[origin: EP2703573A1] The pop-waste set has a drain portion that is defined at bottom through holes (2.1,2.2) of a tub (1) or a shower tray by two fasteners. A cover for tub or shower tray is defined above an inlet opening of drain portion. A discharge gap is limited by water to the inlet opening of the drain portion. The cover has two spaced-apart connecting elements that secure an outlet fitting. The distance between the connecting elements is larger than the width of the cover. An independent claim is included for a sanitary object.
