Abstract (en)
[origin: EP2703726A1] The device has a hob support unit (32) that is provided in assembled condition and in mounting position on a support for an electronic unit. The hob support unit is partially formed as a grid. An electronic carrier element (62) for support of the electronic unit is provided in the hob support unit. A bearing (66) is provided for guiding the movement of the electronic carrier element. The bearing is provided with a swivel bearing (68). The support unit comprises an assembly region (42) for the electronic unit.
