Abstract (en)  
[origin: EP2703766A2] The weapon has a weapon frame with a handle, and two barrels comprising a tipping drop barrel unit (11). A bi-functional- or multifunctional beat lever unit comprises two beat levers (19, 33) independently movable from each other when triggering weapons. The levers pressurize firing pins (28, 29) of a firing pin unit (27), where the firing pins are arranged in spaced positions. The firing pins are attached to the barrels of the weapon. The levers are attached with movable instep condition indicators (25), which display tensioned state of the levers in a stressed position.
