Abstract (en)

[origin: EP2704172A1] The rotor has rotor housing (110) and a rotatably mounted contact bridge unit (200) that is provided with two movable contact portions (210,220). The movable contact portions are cooperated with fixed contact portions by rotation of main portion to open or close an electric circuit. The contact bridge unit is movably mounted in rotor housing in a direction perpendicular to direction of rotational axis in closed position.
