Abstract (en)

[origin: WO2012172219A1] The invention relates to an absorber for absorbing a fluid, including a bottle having at least two parallel passage contactors which are arranged in series in the direction of the path of the fluid to be absorbed, and which include inner insulation. Each parallel passage contactor has channels, and the channels are at least partially sealed over a centripetal radial distance of 20 cm from the outer perimeter of the parallel passage contactor.
