Abstract (en)

[origin: WO2012150217A1] The invention relates to a cabinet, in particular a safety cabinet or a cabinet for hazardous materials, for storing preferably liquid hazardous materials. The cabinet is equipped with a cabinet body (2), at least one cabinet door (3) that closes an access opening (4) in the cabinet body (2), and an air conducting unit (15) for generating an air curtain (18) in the region of the access opening (14). According to the invention, the air conducting unit (15) is designed in a variable manner with respect to the required quantity of air.
