Abstract (en)
[origin: WO2012149922A1] The invention relates to a torque transmission device (20, 7) for the drive train of a passenger car. Said drive train comprises two engines, wherein one of said engines is an electromechanical energy converter (9). Said torque transmission device is inserted into a rotor recess (3), which is arranged in a rotor assembly (4) of said electromechanical energy converter.
