Abstract (en)
[origin: WO2012150228A2] The invention relates to an emergency box for use in an elevator, containing aids for elevator emergencies, wherein the emergency box is provided with an emergency connection device, which can establish a connection to a central control station if the elevator is not functioning and has stalled, wherein the emergency box can be opened only by means of a personal identification number, which is provided by the central control station. The emergency box can be connected to further sensors and safety devices for an expanded functional scope. In particular, said sensors and devices are smoke detectors and position contacts or oxygen masks, fire extinguishing agent containers, and airbags installed in the elevator cab.
