Abstract (en)

[origin: WO2012169950A1] The invention relates to a method for the removal of snow from tracks or track areas for track-bound vehicles. The snow is transported by a snow collection device (10) to a snow melting device (50) where the snow is melted down to water, after which the melt water is transported to a liquid container (70) from which the melt water is tapped off as required. The invention also relates to a device.
