Abstract (en)

[origin: EP2705881A1] The device has a controller (4) for actuating fire extinguishing agent launchers (3) and a position tablet (1). The position tablet geometrically maps actual target positions (8) of a fire extinguishing agent (5). The position tablet consists of a pressure-sensitive touchpad or a computer-based smart tablet personal computer. The position tablet marks or prints a sketch of an erasing object (9) with the geometric target areas of the extinguishing agent launchers. A computing unit (2) is integrated or attached to the position tablet. An independent claim is also included for a method for actuating fire extinguishing agent launchers.
