Abstract (en)  
[origin: EP2705960A1] The instrument (1) has a front body (2) comprising an ergonomic grasping asymmetrical segment (4) formed relative to a longitudinal plane (A) and an asymmetrical rear body (3) formed relative to another longitudinal plane (B). The rear body rotates relative to front body about longitudinal axis corresponding to line of intersection between position adapted to gripping with right hand and other position adapted to gripping with left hand. The line is formed between the planes. The segment has a rib (6) oriented longitudinally and radially projected relative to a grasping surface (8) of segment. An independent claim is also included for a method for using a writing instrument.
