Abstract (en)
The clip (1) consists of a cable lug (2) comprising copper and a conductor (3) comprising aluminum, that are respectively welded together, such that a weld joint is formed by an electromagnetic pulse shaping technology. The conductor is introduced a closed-end sleeve-shaped conductor receptacle (4) of the cable lug, and welded. A loop (6) which is greater than 30 [deg] and less than 60 [deg] to a longitudinal axis of the conductor receptacle, is inclined at an angle. An independent claim is included for a method of manufacturing a grounding clip.

Abstract (de)
Die Erfindung betrifft eine Erdungslasche (1) und ein Verfahren zum Herstellen einer Erdungslasche (1), umfassend einen Kabelschuh (2) und einen Leiter (3), wobei der Kabelschuh (2) und der Leiter (3) miteinander verschweißt sind, wobei die Schweißverbindung mittels elektromagnetischer Pulsumformtechnologie hergestellt ist.
