Abstract (en)
The invention relates to a wall bracket for facilitating construction work. The wall bracket comprises a support structure (110) to be fastened to a wall (12), and a bracket structure (120) to be placed to rest on the support structure as a working surface and fall arrest for a person (30) or another load. The bracket structure to be placed to rest on the support structure (110) to be fastened to a wall comprises a working platform frame (150) which forms at least two different height positions and is provided with an upper support (152) and a lower support (154) for at least partly non-superimposed working platforms (152a, 154a).
