Abstract (en)

[origin: EP2706173A2] The closure equipment has a closure cylinder (1) with a cylinder core (3) rotated in a closure cylinder housing (2). A connecting unit is provided for mechanically and electrically detachable connection of a handle with the cylinder core. The connecting unit has two electric contacts (21) that are arranged at a different radial distance from a rotary axis of the cylinder core, where the annular counter contacts are arranged on corresponding the diameter. The electrical contacts are arranged on the cylinder core, while the counter contacts are arranged on the handle.
