Abstract (en)

[origin: EP2706182A2] The load transfer device (3) has a frame-side fitting portion (4) and a wing-side fitting portion (5) with which a supporting device (6) is coupled. The frame-side fitting portion or wing-side fitting portion includes a base. A bearing portion is connected with the base in closing position of a wing (2) and is coupled at the supporting device. The bearing portion is coupled with a holding element in a pre-assembly such that the connection strength between the bearing portion and holding element is lower than the connection strength of the bearing portion with base.
