Abstract (en)
[origin: EP2706239A2] The pump i.e. centrifugal pump (1), has a pump housing (2), and a motor shaft (5) connected with a pump impeller (6) that is arranged in the housing. The motor shaft extends through a shaft passage (4) in a rear wall (3) of the housing. The motor shaft is provided with a sliding ring sealing arrangement (8) in the rear wall. A sealing seat (9) of the sealing arrangement is arranged in a ring-shaped protector that is made from corrosion-resistant material i.e. bronze material, where the protector is fixedly arranged in the shaft passage. The housing is designed as a grey cast iron part.
